

Rosguill Developments Ltd Charlotte Street SITE NEWSLETTER No 2

Rosguill Developments we have now been on site for 4 months

It has been a hectic period of demolition, underpinning and associated works inevitably impacted as local residents and business premises alike.

Thankfully this intense period of noisy and disruptive works are coming to an end.

As an indication of site activity we have recorded 108 no18 yard vehicles for 'Muck Away' trips and over 280 site deliveries of materials.

Our new structural works to the rear courtyard are just about to commence involving auger piling which demands site deliveries of ready mix concrete.

In addition to the above we are covering out structural works to the existing building to cater for the new 4th floor residential apartments.

We have worked with local business and residents listening to their comments and adopting a pro-active approach to allay their concerns. We will continue to do so.

Assuring you of our best efforts in delivering the scheme that will enhance the street scene.
